EVS

SPECIALIST INFORMATION FOR THE OIL AND GAS SECTOR DELIVERED ON TIME AND AT SCALE.

Energy translations

Being a strategic translation partner to clients in the energy sector requires the ability to drive quality while delivering content at scale. EVS Translations coordinates its global in-house teams, across all project critical areas, to create precise and consistent translated-content regardless of volume and timeframes.

Our clients include leading E&P companies, environmental consultancies, manufacturing companies and even law firms working within the energy sector. We've delivered Environmental Impact Assessments (EIA) in French, Social Impact Assessments (SIA), tender submissions, health & safety regulations and marketing collateral for events.

Our translators assigned to your energy projects work consistently within this subject-specialism to establish precision in the translated concepts and terminology. We develop customised glossaries and terminology databases for access during live projects.

Our ISO certified processes for Quality Management have been tried and tested over the past 25 years to meet the specific needs of the energy sector. The security of your data is also paramount: our internal IT department manages data-security measures in-house and we partner with an ISO 27001 certified data center in Germany.
