- Customisable workflows
- Native speaking expert linguists

# MACHINE TRANSLATION FOR THE SECURITY & DEFENCE SECTOR

Rapid, secure, cost-effective. Leverage AI-driven solutions to automate translation production. Then integrate the technology into existing workflows and customise further.

## ABOUT EVS TRANSLATIONS

We are a Europe- and US-based translation provider with an in-house team of 150+ experts. Our combination of linguistic skill and technology know-how helps businesses to deliver a diverse range of multilingual digital content, globally.

EVS Translations UK Ltd.  
 Newstead House  
 Pelham Road  
 Nottingham  
 NG5 1AP

- ### MACHINE TRANSLATION AT A GLANCE
- Rapidly translate urgent or high-volume content
  - Use secure closed systems with data stored in the UK
  - Automate production for scalability and cost-savings
  - Enhance raw MT output with professional human post-editing
  - Integrate existing corporate terminology into engine data
  - Develop engines for customised solutions e.g. for e-discovery

### HOW CAN EVS TRANSLATIONS HELP MY TEAM?

Our in-house technology team helps businesses to automate translation production within a secure environment. We also develop custom solutions to solve specific issues e.g. translation interfaces for global internal departments.

### OUR CLIENTS AND PROJECTS

Defence contractors, aviation companies and government bodies partner with EVS Translations for sensitive, high-volume translation work. From communications and technical documentation (including RFP documentation) to cross-border M&A deals.
