

TRANSLATIONS FOR VOICE-OVER OF VIDEOS, SUBTITLES, OR TRANSCRIPTIONS;  
STAND-ALONE PROCEDURES WITHOUT TRANSLATIONS ALSO AVAILABLE.

## Voice-over and subtitling services

As an increasing number of businesses harness the power of video to engage consumers or to train a global workforce, program and project managers and internal communications departments partner with EVS Translations for [video localisation services](#).

We recreate original video assets in new languages so they can be launched confidently in international markets. Our video localisation team regularly works on C-suite Q&A livestream events, quickly turning around subtitled versions that can be made available to global teams.

Our subtitling and voice-over services enable scientific institutions to access a global video library of laboratory methodology for the medical and healthcare sectors. Learn more with us about creating international videos.

### HOW YOU BENEFIT WITH EVS TRANSLATIONS:

- Experienced subject matter experts working with terminology specific to all major industries
- Translation management – complex projects supervised along the entire value chain
- A dedicated translation engineering team that understands your corporate objectives
- Ready-to-publish files or subtitles in a separate SRT/VTT file
- Data security: EVS Translations offices comply with international data protection law
- Consistent implementation of your corporate language and brand voice

## We deliver localised videos that are ready to launch

Our technical and linguistic teams combine their expertise and state-of-the-art AI technology to deliver market-leading video localisation services.

Choose from stand-alone services, such as voice-over recording, or the complete localisation package: all subtitles, on-screen text, and voice-over recordings embedded for finished videos that are ready to launch.

Our video translation service includes:

- Script creation (including transcription and time-coding)
- Subtitling (delivered as subtitle files or embedded in the video)
- Voice-over recording (samples can be provided, and recordings can be delivered as audio files or embedded in the video)
- On-screen text translation (including kinetic typography)
- AI-generated voice-overs and human voice actors.

We work with Adobe Premiere Pro, Adobe After Effects, Final Cut Pro, and other leading video editing or motion graphics software programs to ensure a high-quality finish.

Leverage our Unbabel [LangOps portal](#) and technology integration for all your additional translation services and to create an interconnected translation ecosystem.

EVS Translations and Unbabel support your business to create content that has a global reach.
